EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert H. Berdo, Jr. on 9/13/2004.

The application has been amended as follows:

IN THE SPECIFICATION:

On page 3, line 7, "blocked" was changed to --does not block --.

IN THE ABSTRACT:

In line 8, "blocked" was changed to --does not block --.

IN THE CLAIMS:

In claim 1, line 3, --a -- was inserted before "power supply".

In claim 1, line 7, "push receiving" was replaced with -- pushing said received-- .

In claim 1, line 8, -- said -- was inserted between "cabinet," and "paper".

In claim 1, line 9, -- being -- was inserted before "fastened".

In claim 1, line 10, --said -- was inserted before "received paper".

In claim 1, line 15, --said -- was inserted before "received paper".

In claim 1, line 20, --said – was inserted before “received paper”.

In claim 1, line 24, “moved” was replaced with – movable upon contact --.

In claim 1, line 25, “close/open” was replaced with –close or open--.

In claim 1, line 27, -- a – was inserted before “signal”, and --said – was inserted before “power”.

In claim 1, line 28, “blocked” was replaced with --does not block –.

In claim 4, “claim 1” was replaced with --claim 3 --.

The following is an examiner’s statement of reasons for allowance: The general structure of a bill validator and cash box combination is shown in the art. The invention lies in the structure for shutting off the system upon receipt of a signal that the cash box is full. Claim 1 recites “a bottom track on the inside at said bottom panel [of the cash box], a sensor hole through said bottom panel, a spring-supported slide inserted into said bottom track and movable upon contact with said pressure board to close or open said sensor hole; ... a sensor means controlled to emit a signal to said sensor hole and adapted for cutting off said power supply when said slide does not block said sensor hole.” While photo cells for detecting a full cash box by detecting movement of the pressure board in response to the accumulated bills are shown (as best shown in Hatamachi et al), the structure showing a separate spring loaded slide mechanism movable upon contact is not shown. The combination was therefore found to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
